Code Examples

JavaScript

```
function convertMarkdown(input, output) {
  const { convertMarkdownFile } = require('md-mermaid-pdf');

  convertMarkdownFile(input, output, {
    title: 'My Document',
    theme: 'default'
  });

  console.log(`✅ Converted ${input} to ${output}`);
}
```

Python

```
def process_data(items):  
    """Process a list of items"""  
    results = []  
    for item in items:  
        if item.is_valid():  
            results.append(item.process())  
    return results
```

Bash

```
#!/bin/bash  
  
# Convert all markdown files to PDF  
for file in *.md; do  
    md-to-pdf "$file" "${file%.md}.pdf"  
done
```
